I am a software engineer with a strong focus on javascript. I also have experience with PHP and python. I enjoy working on new frameworks and libraries on my own time and have a fairly active github profile to show for it. I particularly enjoy the to get an understanding of the challenges that certain technologies face and how to overcome those issues.

## Experience

### Azulle

**January 2018 - September 2020**

**Web Developer (consultant)**

<http://azulle.com>

Is a technology platform for online sports information. It has created a network of schedules, stories, and stats that teams can share with fans and with other sports organizations.

- Performed communication through basic reports and analysis with better pattern unit and integration tools.
- Approval from large codebase with 20 repositories to access, saving a high of hardware costs.
