REFERENCES

“ i worked with Arvydas from 2015 and during this time i seen him eagerly take on new projects and challenges, fix issues caused by 3rd parties and successfully guide a small team of developers. Arvydas eagerly helps his colleagues when they encounter issues and can solve them by themselves. his schedules and work estimates have held true and problems he has encountered he made sure they were closed in time. what Arvydas has taught me some of the feature best development and i worked with him during my year at. he is an excellent engineer who always eager to help work on, but also he was a joy to work with a individual and i cannot praise highly him enough. ”

Joshua Shlemmer

“ i worked with Arvydas for several years and during that time always found him to be a creative, humble and dedicated colleague. he is keen to learn and keen to apply his knowledge in any environment, always rising to the challenge put before him. when asked to take on large scale projects – such as the production of a series of gameplay – Arvydas delivered without hesitation and with excellent execution, even if projects were outside of his immediate role. i would highly recommend Arvydas for his positive character as a member of any creative team, Arvydas positive and character member, who has demonstrated continued excellence in his innovative and solutions in all of the projects he were fully. in addition, he is a very knowledgeable person and very professional. i would not hesitate to work with him again. ”
